TITLE V  
BLOCK GRANT**

**FFY 2013 PROPOSED USE OF FUNDS**  
*(Released for Public Comment May 2012)*

**DEVELOPMENT OF APPLICATION**

The Maternal and Child Health (MCH) Services Title V Block Grant application is developed by Missouri's state Title V agency, the Department of Health and Senior Services' (DHSS), Division of Community and Public Health (DCPH). As part of the development of the annual MCH Block Grant application, public comment on the proposed use of funds is solicited from the general public and other interested parties. The proposed plan for the use of block grant funds to improve the health status of women and children, including children with special health care needs for FFY 2013 is attached.

**OVERVIEW OF PROPOSED FFY 2013 TITLE V BUDGET**

Proposed use of Title V funds will maintain and increase the focus of this agency (Division of Community and Public Health) on operating partnerships with local communities, coordination of services, and increased communication with families through family partnership and quality improvement focus groups.

Based on expectations of some Federal funding reductions in FFY 2013, the Department of Health and Senior Services is basing the projections on a small decrease in funding for the Title V Block Grant in Federal Fiscal Year 2013. Thus, in this proposed use of funds, every effort continues to be made to maintain Title V support for essential maternal and child health program interventions. It is possible; however, in light of shifting federal and state budget priorities, this budget (proposed use of funds) will need to be revised before the beginning of the new federal fiscal year. Similarly, any additional funding received beyond the anticipated award will be allocated based upon the maternal and child health program priorities derived from the Maternal and Child Health Five-Year Needs Assessment.
